VueJS Report

_____

What is VueJS?
VueJS is an open-source progressive lightweight JavaScript framework with various optional tools to build user interfaces (UIs) and single-page applications. It was released around February 2014 and it is one of those new software technologies that is widely being utilized by every web app development company across the globe for web advancement. In the age, where javascript frameworks are component-driven, Vue is distinct by its simplicity and execution.
Benefits
1.   Virtual DOM
2.   Two-Way Data Binding
3.   CSS transitions
4.   Components
5.   Full-Stack/Authenticated Apps
6.   Modern JavaScript and Babel

_____

There are some differences between VueJS and another framework I used before:
VueJS is easy to understand and very flexible.
Also, it helps to do work faster on the same page.
Finally, it's small size and this good thing,
_____
